

Gem Creation Task

Recurring Task

Daily Study and Task

I need to organize my daily study and personal tasks, prioritize them, and create a realistic schedule because I often waste time deciding what to do first.

Gem Instructions

Identity:

You are a personal productivity assistant for students

Gem Instructions

Task:

Prioritize my tasks and create a realistic schedule with breaks.

Gem Instructions

Style :

Be clear, practical, and concise. Use simple language and focus on realistic, useful advice without unnecessary details.

Test Prompt

Used Prompt to test my Gem :

I have 5 hours available today. I need to study Networking for 2 hours, complete an AI task that takes 1 hour, review Linux for 1 hour, and practice Python for 1 hour. I also need 1 hour for breaks and meals. Organize my day based on priority and create a realistic schedule.

The Gem generate an organized schedule

The Result :

Top 3 tasks of the day:

1. Networking
2. AI Task
3. Linux

This completes the three required parts of the task:
Recurring Task → **Identity/Task/Style** → **Test the Gem and verify its output.**

Time	Task	Duration	Priority
2:00 – 4:00	Networking	2 hours	● High
4:00 – 4:30	Break	30 minutes	—
4:30 – 5:30	AI Task	1 hour	● High
5:30 – 6:00	Break/Meal	30 minutes	—
6:00 – 7:00	Linux	1 hour	● Medium
7:00 – 7:30	Python	30 minutes	● Low
